MESSAGE

I am feeling delight to learn that “**International Congress on Post-Harvest Technologies of Agricultural Produce for Sustainable Food and Nutritional Security**” is being jointly organized by **Uttar Pradesh Council of Agricultural Research (UPCAR), Lucknow** and **Integral Institute of Agricultural Science and Technology (IIAST), Integral University, Lucknow** on 10th-12th November, 2016 at **Integral University, Lucknow**.

The yearning for the propagation and communication of post harvest technologies at the ground level to meet the food demand of the rising population is the need of the hour. The development of the new technologies for the farmers is seen as one of the most accessed solutions to the problems of food and agriculture in India. I am confident enough to state that the congress is certainly going to serve as a starting point for a more in-depth conversation among scientists, consumers, industries, farmers and government about the near and long-term uses of innovative ideas in the field of post harvest technologies of agricultural produce.

I am very sure that this congress will bring researchers around the globe to discuss the new trends on post harvest technologies in agriculture and link them with sustainable food and nutritional security. This provides a much needed program for exchange of the meaningful dialogues among expertise of field, innovative ideas as well as propagation of new ideas to our farmers.

I extend my best wishes and compliments to the organizers of the congress and wish that the deliberation will prove quite fruitful to the agricultural agencies, scientists, policy makers as well as participants. I also wish to convey my hearty congratulations to all the members of the Integral University and wish them a grand success.

June 21, 2016
